Saypot San

About Me

Saypot San (Sanny Dermawan), Vice Chair of Brawijaya Web3 Labs and Web3 community builder. In Web3 since 2023; ambassador, moderator and content creator since 2024. I also build with Claude Code: AgentEco won 2nd and 3rd place at two hackathons.

Work Experience

Girl Meets Tech

- Junior Project Builder Intern (Oct 2026 - Now)
- Build AI-assisted Web3 products with Claude Code: test, debug and deploy smart contracts and websites to mainnet.

Tuna Chain

- Manage global and regional channels and participate in organizing Discord Activities that increase community engagement by ~250%. Also, actively create content in the form of threads, tweets, and memes.

Gora Network

- Create informative threads and tweets explaining the role of oracles in the Web3 ecosystem.

eNap

- Managing Telegram channels and developing engagement strategies.

Rome Protocol

- Actively participate in community education by creating threads with an average of 1,000 views and short videos.

AIVille

- Regularly create content such as threads, articles, videos, and posts on Binance Square, with several posts reaching 20K to 95K views.

Community & Other Roles

- Vice Chair and manager of Brawijaya Web3 Labs (formerly Superteam Campus Club UB). Ambassador for Adot, Legend of Arcadia, YieldFi and MossAI: threads, memes, short videos and articles.
